ENVIRONMENT and SUSTAINABILITY STATEMENT

Worldwide International Limited T/A Publiship is committed to leading the industry in minimising the impact of its activities on the environment.

The company will comply with all relevant environmental legislation, we will also seek to exceed minimum requirements and continuously monitor and improve on matters within our control.

We will minimise waste by evaluating operations and ensuring they are as efficient as possible. We will continue to progress on paperless working, electronic transfer of data and documents and invest in technology to improve on this further.

Actively promote recycling both internally and externally. By working with our building managers we will endeavour to recycle as much waste as possible to include, packaging, paper and paper products, food waste, printing consumables, furniture.

Minimise toxic emissions. All company vehicles have now been changed to low emission vehicles and we will seek to investigate new technology each time vehicles are due for renewal.

We will promote waste reduction and solutions with suppliers and clients. Electronic document transfer reduces paper waste, reduces cost, transit pollution, all clients and suppliers should be encouraged to receive documents by electronic means rather than by papers sent via courier or post.

Sourcing. We will seek to use suppliers who have the similar ethical working practises wherever possible.

Routings. Where possible we will encourage and promote routings of cargo that will have lower CO2 emissions, even when they may be more expensive. For example using rail options rather than road.

Training. We will seek to advise new members of staff on induction about their Environmental responsibilities and we will also run reminders and workshops every 6 months as part of our premises commitment to waste and recycling.

SUE KELLY
Operations Director
